We are having the talent and the experience to become the best performers. We also have knowledge of various key areas that will definitely impact bottom line.

Our team is comprised of core professionals in this field, who have been dedicated to solar industry for the past several years. The combined experience of our core group exceeds 20 years in solar water heating and solar related products. Our team in Marketing, Production, Quality and Projects are veterans in their respective areas with the design and installation experience of over more than 3Lakh litres (Yearly) in solar water heating system.

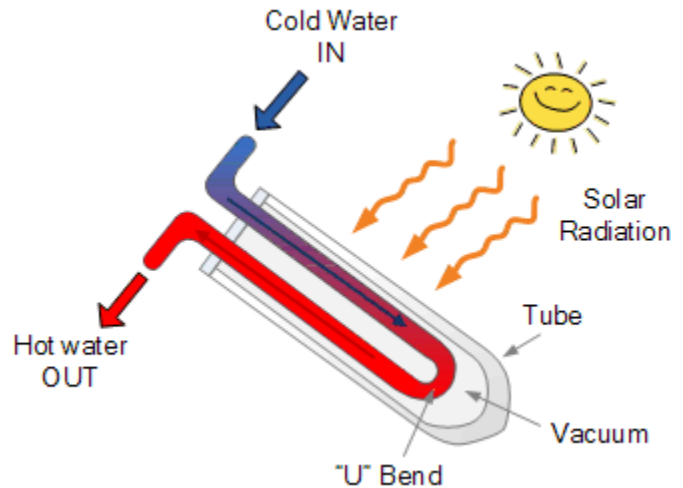

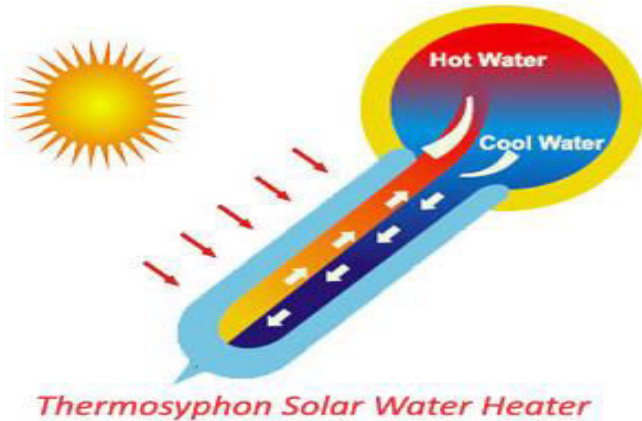

OUR MISSION

- To create awareness about the uses of Solar, Wind, Biogas and Biomass based various technologies among the public.
- High standard quality solar products manufacturing company in the Domestic as well as in Indian Market.
- Adopting the latest technology, product innovation and quality enhancement are the prime objectives for our growth.
- We build trust and teamwork to enthusiastically enhance high standards in manufacturing Solar Products and continuing maintaining our services efficiently and business network support. We ensure for best products and services to endeavour to exceed customer expectations.

STRENGTH

- Our Main Strength In house Production.
- Solar Water Heater Products comprising best quality, standard and durability
- Most modern and fully-equipped Manufacturing Plant.
- Capability to handle Big Projects.
- Qualitative, Innovative and Cost-efficient Product Range.
- Consistent Services and Customer Support
- On-time Product Delivery's.

The Evacuated glass tube solar system is more efficient than flat plate solar collector because of its round shape, as the sunrays falls perpendicular any time, so the Evacuated glass tube solar system get the temperature faster than flat plate collector, and because of vacuum between the tubes, the heat loss during the cold night is very low than flat plate collector, so this system maintain the temperature overnight.

Benefits of Solar Evacuated Tube Systems

You might be wondering about the benefits of this amazing solar product. If you do not have any idea about this then we have brought you some of the best perks of using this product. Scroll down to check them out.

- They are the most efficient if they are installed correctly.
- Solar evacuated tube systems are available in a wide variety to choose from.
- You can also increase the efficiency according to your will in some models.
- They do not make a noise like most of the electrical devices.
- They are affordable and can be installed anywhere.
